

DSL High Speed Internet Service – Rates Effective 2/9/2009

DSL (Digital Subscriber Line) service is now available in Roxboro and Yanceyville. The service area extends approximately 3 miles from the center of both cities. Call us if you are not sure if your area is within 3 miles and we will check it for you. With DSL no additional phone line is needed so the final result is less money per month with DSL.

DSL uses your current phone line to provide service. We install a “splitter” box so that you may use your phone and the internet at the same time. In most cases you can cancel the second phone line service if you currently have one and save \$30/month.

DSL is always on and doesn’t require any wait time to connect. Speeds are available from 256K and up. The phone line connects with a analog connection at 30K to 50K so DSL is some 10 to 15 times faster.

The current promotion for DSL service is as follows.

Speed - 256K (Higher available)
 Term - One Year
 Installation - by ESI
 Service - DSL Broadband
 Install Charge – \$99
 Hardware required – DSL router – Included in installation charge (\$249 value)

Service	Speed	Monthly Rate
ESI DSL Light (Home only)	256/128	\$34
ESI Basic	768/128	\$39
ESI Express	1.5M/384	\$44
ESI Screamer	3.0M/512	\$49
ESI Server	5.0M/768	\$64

Added Services - Email scanning for junk mail, porn and viruses
 Support – ESI local office
 Our prices include taxes – **other suppliers add on tax and access fees.**

Other companies are offering DSL service in this area. The difference we offer is that we are your single source provider of computer and internet services where the others just want to sell DSL. If you have a problem, just one call to us will resolve it. Also, DSL requires installation in your PC with either a USB port or a network card. Sometimes these can cause problems.

We also provide email virus and junk/porn mail scanning with our service. This is especially important when connected full time to a DSL network.

We have both DSL modems for single PCs or DSL routers which will allow several PCs to connect to one DSL connection. Contact us to discuss the option best for you.

If you are operating a business, be sure to have your network protected with a firewall to insure no one “breaks in” to your system. This could be disastrous. We can provide the firewall and perform the security analysis for you.

Electronic Solutions, Inc. is your only local service provider that you can always depend on to look after you as our customer. Other companies may charge \$50-100 for a service call just to fix something simple. We offer free tech support to our customers. When comparing services, we think you will find we are the best both initially and down the road! Call ESI for all your internet and computer services. (336) 597-2433

We are now taking orders for installation of DSL . Call us to reserve your place on the High Speed Digital Highway! Or go to this link. (www.esinc.net/internet/dsl.asp)
